montagne d'or

A gold mountain sits in the woods.
Dappled light filters through the canopy.
A luminous glow, emerging with each step.
An arm extends, the surface is touched.
A single delicate leaf in the palm of a hand.
3 - 2 - 1, falling...
Cradled in a sea of gold.
Eyes towards the sky.

"Montagne D'Or" proposes a mountain of painted poplar leaves within the east-west axis of the festival site. Designed as a constantly shifting installation, the project invites visitors to create their own landscape of gold in the forest.
